

Hands ON Evaluation Form

Name: _____

Faculty: _____

Abdomen Station:

Faculty: “Show me the splenorenal space”

- Uses low frequency probe in abdomen preset
- Adjusts depth appropriately
- Adjusts gain appropriately
- Identifies kidney
- Identifies spleen
- Identifies diaphragm

Faculty: “Show me the right hemidiaphragm and liver”

- Identifies right hemidiaphragm
- Identifies liver

Vascular Station:

Faculty: “Show me the internal jugular vein and artery combo”

- Uses high frequency probe in vascular preset
- Adjusts depth to center vessels on screen
- Adjusts gain so that vessels are seen appropriately
- Identifies vein versus artery by compression technique

Faculty: “Show me the descending aorta”

- Identifies appropriately the spinal shadow
- Identifies long and short axis views of the proximal descending aorta
- Identifies major branches of the descending aorta

Faculty: “Show me locations of evaluation of lower extremity deep veins”

- Identifies and appropriately compresses the common femoral vein
- Identifies the greater saphenous takeoff of the common femoral vein
- Identifies the deep femoral vein
- Identifies the popliteal vein

Please identify up to three concrete, measurable changes you plan to apply as a result of participating in this program. Your responses will help us better evaluate specific areas of impact and future conferences. As a result of this program, I commit to change the following:

- 1.
- 2.
- 3.
