

Critical Care Ultrasound Curriculum University of Florida Health

Hands ON Evaluation Form

Name: _____

Faculty: _____

Pleural/Lung Station:

Faculty: “Show me sliding lung, rib shadows, and A lines”

- Uses low frequency probe in abdomen preset
- Adjusts depth appropriately
- Adjusts gain appropriately
- Identifies lung sliding
- Identifies rib shadows
- Identifies A lines

Faculty: “Show me the right hemidiaphragm and liver”

- Identifies right hemidiaphragm
- Identifies liver

Echo Station:

Faculty: “Show me parasternal long view and name chambers, valves, and descending aorta”

- Uses low frequency probe in cardiac preset
- Adjusts depth to center cardiac chambers on screen
- Adjusts gain so that cardiac chambers are anechoic
- Identifies appropriate parasternal long window
- Identifies the mitral valve, aortic valve, left ventricle, right ventricular outflow tract, and descending aorta

Faculty: “Show me the parasternal short view at the mid-ventricular level”

- Identifies an appropriate parasternal short window at the papillary muscles

Faculty: “Show me the apical 4 chamber view and identify the chambers”

- Identifies an appropriate apical 4 chamber view
- Identifies the left ventricle and right ventricle

Faculty: “Identify a longitudinal view of the inferior vena cava”

- Identifies the appropriate view of the IVC

Please identify up to three concrete, measurable changes you plan to apply as a result of participating in this program. Your responses will help us better evaluate specific areas of impact and future conferences. As a result of this program, I commit to change the following:

- 1.
- 2.
- 3.
